

## AEGT15051/AEGT15052: AEG 60cm 8W T8 Tube

<b>Lumen Output</b> 1,040 lm	<b>Voltage</b> AC 110-240V	<b>Power</b> 8W	<b>Lifespan</b> 50,000 hr
---------------------------------	-------------------------------	--------------------	------------------------------

- AEGT15051/52 is a professional T8 tube that uses SMD LED technology, with very high luminous efficacy.
- It is characterized by excellent thermal management due to its aluminum heat sink.
- It is suitable for areas requiring heavy use and 24/7 operation, such as: hospitals, hotels, airports...

**Model Number: AEGT15051/ AEGT15052**

### Features:

- SMD technology
- Non- Flickering
- Aluminum + PC
- IP: 20
- Lifespan: 50,000 hr
- Warranty: 5 Years based on normal use  
2 Years based on 24/7 use
- Certificates: CE, RoHS

### Electrical Characteristics:

- Power: 8W
- Voltage: AC 110-240V
- Frequency: 50/60 Hz
- PF: > 0.9

### Light Characteristics:

- Light Output: 1,040 lm
- Lumen Efficacy: 130 lm/W
- CRI: >80
- Color Temperature:  
Warm White: 3000K  
Neutral White: 4000K  
Cool White: 6000K

### Heat Management:

- Excellent Heat Management
- Aluminum Heat Sink
- Operating Temperature: -20°C → 40°C

## Luminous Intensity Distribution Diagram

## Lux Diagram

## Dimensional Drawing:

## Product Dimensions:

- Length: 590 mm
- Diameter: 27 mm
- Product Weight: 0.1 kg

## Package Dimensions:

- Package Dimensions: 642x200x208 mm
- QTY per CTN: 25 pcs
- Gross weight/ CTN: 3 kg

Notes .....

- The working voltage for the product is 110-240V. Please make sure that the working voltage is between 110-240V before you connect it to the power supply.
- Please check whether there is any damage caused by delivery before you use the products. If there is any flaw, please do not use and inform the supplier.
- Suitable for indoor use only.
